| Product name | Elite Aquarium |
| Brand | Elite Aquatics |
| Product Description | Coffee table aquarium |
| Risk Type | Electric Shock |
| Picture |  |
| Country of Origin | China |
| Risk description | The product poses a risk of electric shock because the table top can be removed from the enclosure by hand, allowing access to electrical connections of internal wiring carrying the mains voltage. These connections are deemed inadequate, as they may separate when subjected to pulling, allowing access to live parts. The product does not comply with the low voltage directive and the relevant European standard EN60335. Seizure of the products was ordered by the authorities. |
