

Category	Lighting
Product name	Femton Clamp Spot Light
Brand	Femton
Retailer	IKEA
Product description	<p>The Femton Clamp Spot Light has been on sale in IKEA since 2004. The item is stamped with a four-digit date stamp (YYWW), a five-digit supplier no. (17796), the IKEA logo and the country of manufacture (China). It has an article number 600.673.23. The Swedish National Electricity Safety Board has tested the lamp and claims its construction could create a risk of overheating. The Femton lamp is a so-called “goose neck” lamp with a flexible stem that allows the beam to be directed at will. Tests have shown a variation of the stiffness of the flexible stem, meaning some lamps could be positioned with the bulb too close to a surface area which could result in overheating. IKEA has received no reports of incidents to date.</p>
